

## ABOUT THE EDITORS

Dr. Orășeanu is a recognized expert in the field of karst hydrogeology and mineral and thermal water data. He has more than forty years of experience working with S.C. Prospecțiuni S.A., National Agency for Mineral Resources and other companies to analyze water resources and to help design to introduce new reservoirs. He is member of the Romanian Association of Hydrogeologists, International Association of Hydrogeologists, Romanian Speological and Karstology Society and Scientific Counsel of Apuseni Natural Park. In 1974-1976, in Benghazi (Libya) he conducted researches aimed to mitigate or eliminate the risk of salted sea water intrusion. In 2000 maintained Ph. thesis "Contribution to the hydrodynamic knowledge of karst systems in Apuseni Mountains". In 2001-2005 Dr. Orășeanu was the president of Romanian Association of Hydrogeologists and starting 1998 he teaches "The hydrogeology of carbonate deposits" for students preparing the master exams at University of Bucharest. Dr. Orășeanu published more than 70 works, most of them referring to the hydrogeology of the karst.

Dr. Lurkiewicz is a researcher of the Environmental Geology and Geophysics Research Department of the University of Bucharest where he develops a variety of activities in the field of a hydrogeology and groundwater resource engineering. He was a professional of the Hydrogeology Department of the S.C. Prospecțiuni S.A., and acted as project manager on numerous national research and applied engineering projects. His activities covered aspects related to water resources assessment and evaluation, mining hydrogeology for ore deposits in different sedimentary volcanic and metamorphic rocks, environmental impact studies and karst hydrogeology. He also acted as a professional or expert for a large groundwater project in Libya. During 2001-2003, Dr. Lurkiewicz served as a consultant for the United Nations Food and Agriculture Organization. He is a member of the International Association of Hydrogeologists, a member of the Romanian Association of Hydrogeologists and a member of the Scientific Council of the National park Semenic - Cheile Carașului. Dr. Lurkiewicz is the author of numerous papers and few book chapters on the subject of groundwater in general, and karst hydrogeology in particular.
